

# Status-quo of Hydrogen Utilisation in NG COM Member Countries

## Roundtable input by N.Macedonia

Energy, Water Services and Municipal Waste Management Services  
Regulatory Commission of the Republic of North Macedonia

*Does your country/organization have a strategy regarding hydrogen?  
If the strategy is in place please outline its main elements.*

- *Currently there is no specific strategy for hydrogen, although in the new draft of the law there are provisions for hydrogen producer, network compatibility etc*

- *Are there any plans to develop the Hydrogen Market and/or the Regulatory Framework?*
  - *After the adoption of the new there will be regulatory framework in terms of licensing the energy activities in relation with hydrogen*
- *What has been the level of exposure of the regulator towards hydrogen?*
  - *Its in very early stage and apart from the new draft of the law and some technical standard that new networks need to have we haven been much exposed to the hydrogen market*
- *Are there any completed or ongoing tasks/milestones?*
  - *The new draft of the law that includes provisions regarding Hydrogen*

# Industry/Market Level

---

- *Are there any Pilot Projects developed or in development?*
  - *No*
- *What is the general interest in developing hydrogen networks/markets in your country from the supply side and how many companies have been involved (in rough terms)?*
  - *Its very early stages and we haven't yet seen interest from the companies*

**THANK YOU  
FOR YOUR ATTENTION!**
