# Main Update

---

When Balance is Achieved

**Currently, there are no significant updates in the gas sector.**

**We have some ongoing main processes:**

**Focus on Market Liberalization Processes** - The sector is focused on market liberalization, holding meetings with companies and conducting various types of working sessions.

**Gas Tariffs** - There are no updates regarding gas tariffs. In 2022, the three-year tariffs were replaced with a five-year calendar period.

**Investment Projects** - At this stage, we are working on investment projects, verifying actual investments and coordinating the upcoming five-year network investment projects.

**Monitoring New Connections** - Additionally, there is ongoing monitoring of new connections to assess whether the reported expenditures for these projects align with market data. These activities are part of the preparatory process for the upcoming tariff year.
